

IST Shaping the Future

# Técnico Shaping the Future

Programme for the 7th edition of Fundamental Training

14th, 15th and 16th September  
at Academia das Ciências de Lisboa

# *Accelerating Careers, Promoting Development, Increasing the Impact of IST Junior Faculty*

## **What is it?**

The Fundamental Training for Assistant Professors and Researchers is part of a set of initiatives that IST offers to Assistant Professors and Assistant Researchers during their tenure-track period.

The goal is to promote their adaptation to IST's culture, to give them a set of ethical values and good institutional practices, and to contribute to the definition of their professional identity and the construction of a career development plan.

During three days, all those recently integrated as junior faculty receive training in team leadership, research projects and science communication, promoting their professional success, but also in pedagogical skills so that they may actively contribute to the promotion of excellence in teaching. It is intended that they explore their full potential and increase the impact of all dimensions of their activities as IST faculty.
